

Supply Chain Digitalization Conference & Exhibition 2025

May 1 - 2, 2025 | Houston, TX, USA

Leveraging The Technology Innovation and Digital Revolutions

Our previous & current sponsors/partners:

ABOUT CONFERENCE

The Supply Chain Digitalization Conference 2025 brings together supply chain & technology innovators to push forward a complete digital transformation within the supply chain. This platform will include the entire Supply Chain & Procurement, Transportation and Logistics industry together with Manufacturer, Retail, Consumer Goods, Chemical, Oil & Gas, Food & Beverage, Pharmaceuticals, Govt. Officials, Transportation & Logistics providers, and many more to discuss the latest developments & best practices in the industry.

The aim of this event will be to unravel the complexities in supply chain management, focusing on the challenges posed by intricate networks, limited technology use, and trust issues with suppliers. Our goal is to highlight the significance of "visibility" in understanding & navigating these challenges effectively. Especially in times of major disruptions, enhancing visibility becomes a foundational strategy for building resilience. Join us to explore ways to simplify complexities & leverage technological advancements, enabling businesses to establish transparent & interconnected supply chains. With a focused 2-day agenda, the event seeks to foster in-depth discussions on strategies, applied knowledge, & technological challenges within supply chain & procurement operations

CONFERENCE PROGRAM KEY TOPICS

-  Cost-saving Opportunities & Initiatives
-  Alignment of Talent Strategy
-  Incorporate sustainability
-  Risk Management & Service Excellence
-  Bridge the Supply Chain Gap
-  Opportunities and Challenges
-  Best Practices & Case Studies

Rethinking logistics in a volatile operating environment

- As the pandemic has demonstrated, outlier events can shatter the basic premise that materials and components will be easily accessible, especially for companies that have highly regional and non-diversified sourcing strategies.
- There has been a substantial increase in e-commerce activities and consumer buying habits - these continue to stick. As a result, businesses experienced added pressure at different points of delivery, which put pressure on each link
- Businesses need more control of their supply chains - clearly visible in strategic areas of focus of some of the top retailers in the US. However, not all companies have the resources that certain large enterprises do
- How can we implement learnings from the impact of COVID-19 on global supply chains and logistics and how can organizations operate in periods of extended volatility - which is the reality today.

Ahead of Supply Chain: Network Design Optimisation

- Due to significant disruptions over the past decade that exposed the vulnerabilities of global supply chains, many industries are rethinking their strategies by incorporating AI-powered supply chain solutions and automation technologies.
- These innovations help businesses become more customer-centric, agile, resilient, and sustainable.
- The adoption of such technologies is enabling real-time visibility into supply chain operations, allowing for the early detection of potential disruptions and the use of optimization models to support decision-making through multiple planning scenarios.
- In this presentation, I will present a real case study from industries in Colombia that have successfully navigated these challenges.
